

**IPC** Pulex

2014 Catalogue

# IPC Pulex

**P**ulex, a company of the IPC Group, is a world market leader in the manufacture of window-cleaning equipment, products and accessories. Founded in 1963, the dawn of industrial cleaning in Europe, IPC Pulex owes its great success to a high degree of specialisation and a strong drive for innovation.

Targeted research has enabled IPC Pulex to develop a full range of high-tech items specifically designed for cleaning windows in high-rise blocks, in rapid expansion in industrial, commercial and residential buildings all over the world.

IPC Pulex has developed a range of products for different categories of customers, each with their own cleaning needs - squeegees, telescopic poles, sleeves, scrapers, floor squeegees, buckets, reachers and miscellaneous accessories.

Each item is designed and made using the best materials allowing optimal use on windows, including those that are difficult to access, and undergoes rigorous final inspection.

**100% Pulex, 100% Made in Italy**

# Window squeegees

Perfectly straight channels thanks to exclusive ribbing - perfect adherence to the glass.

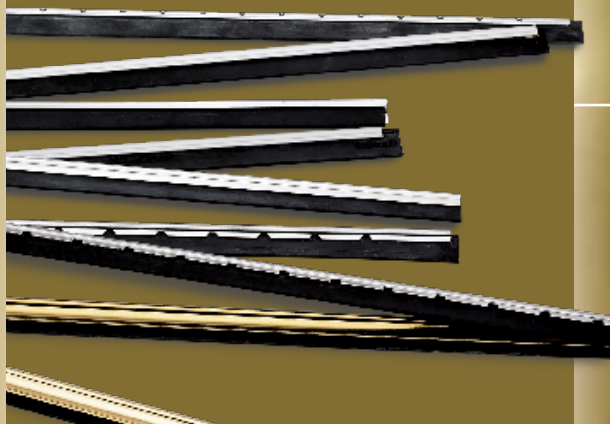

Ergonomic non-slip handles, rounded corners to protect the window frame.

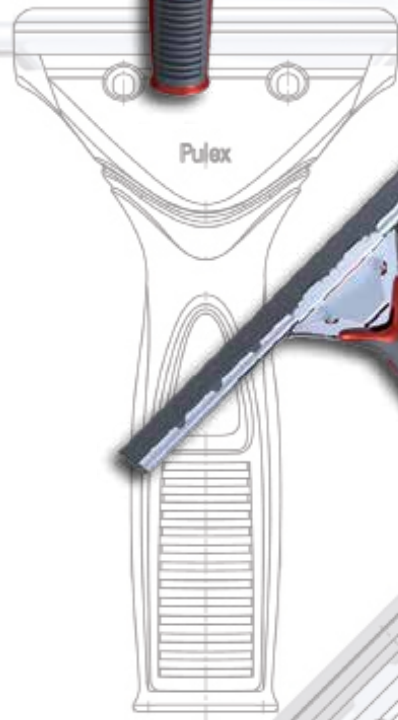

Unbreakable tools - superior quality steel, brass and aluminium, treated so they never tarnish.

Only natural rubber  
Squeegee blades made of vulcanised rubber for the utmost reliability.

**Full range - professional  
squeegees in over 150  
versions, channel and  
blade lengths from 15  
to 90 cm.**

# Replacement rubber blades

Pulex blades guarantee a perfect combination of:

- Raw material - only natural rubber from Malaysia
- Quality of vulcanization  
- 30 years of experience
- Perfection of rubber edge  
- single hot compression moulding  
- single action cutting

PULEX

PULEX

## The rubber is the key

The rubber blade is the most important component of a squeegee, it comes into direct contact with the dirt, cleans and dries the glass.

The unexpensive blades available on the market waste your time because they soon leave unsightly marks all over the glass, they get deformed mainly because of the friction with the surfaces, and because dirt and washing solutions are chemically aggressive. Cheap blades end up to cost more because they last much less and make your work much less effective.

This is why Pulex TQR (Total Quality Rubber) came about to guarantee a long lasting perfect linearity of the blade's cleaning edge and a perfect adherence to the glass, thus making the window cleaning effective and efficient.

Our blades are made out of real vulcanized natural rubber, a mix with no impurity and a perfect molecular dispersion which guarantees elasticity, snap resilience, hardness, resistance to chemical and atmospheric agents.

The cutting is made by precision machines and the perfection of blade's cleaning edges is checked on 100% of our production.

Each single rubber is checked manually.

**100 % control, 0% defects**

- Vulcanized natural rubber
- Better cleaning, better resistance, longer life

- Vulcanized natural rubber
- It's the softest rubber on the market

## The 7 rules of Pulex rubber

1. Only vulcanized natural rubber
2. All raw rubber supplies from Malaysia
3. 30 years' experience in micro-filtration
4. 30 years' experience in special additive mixing
5. Single hot compression moulding
6. Single action cutting
7. Total quality control: each blade is individually checked

# Window washers

A wide range of sleeves and t-bars.

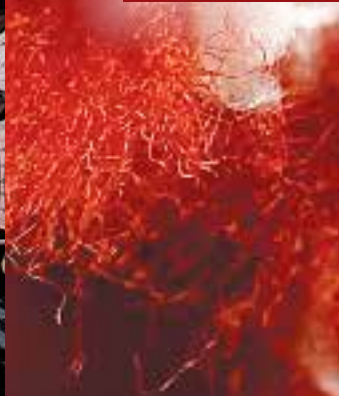

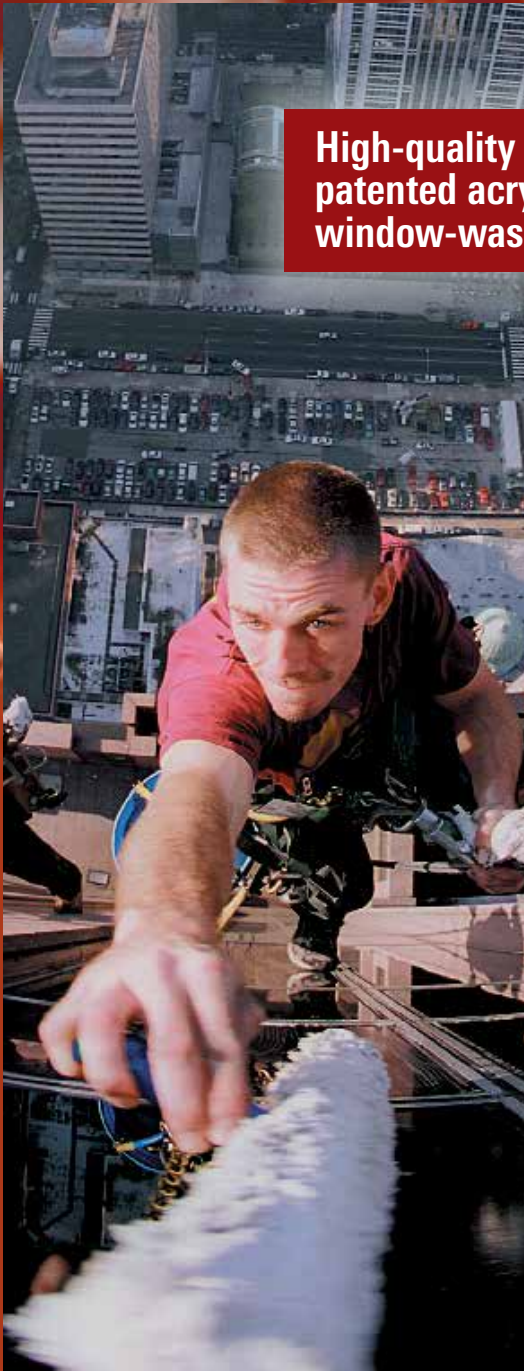

Optimal window washing thanks to the excellent cleaning power of the high-tech fibres, which leave no residue on the surface.

High-quality and exceptionally resistant patented acrylic (dralon) and specific window-washing microfibres.

Perfect combination of honeycomb sleeve holder and sleeve for

- enhanced detergent dispensing
- easy tool cleaning

Some sleeves come with special non-scratch abrasive to remove heavy dirt.

# Floor tools

- **Impact and twist resistance:** made out of reinforced ABS, suitable for prolonged heavy duty cleaning.

**High Quality rubber:** new formulated closed-cell rubber. Very efficient in removing liquids with no absorption. It reduces friction and vibration during use making job easier and more effective.

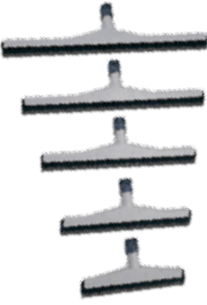

**Splash Guard:** the special splash guard on the base prevents from leaving splashes.

**Universal connection**
